Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 6, 8, 9, 11, 14, 15, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Toy et al.

Toy discloses a semiconductor device packaging assembly, comprising: a chip module 10 mounted on a circuit board substrate 30; at least one integrated circuit chip 16 mounted on the chip module 10; a thermal interface layer 17 in contact with the at least one integrated circuit chip 16; a heat sink 20 in contact with the thermal interface layer 17 and at least one spacer member 47 in contact between said chip module 10 and the heat sink, wherein the at least one spacer member 47 is provided with an adhesive material 53, 53 on top and bottom surfaces thereof; the at least one spacer member 47 comprises a rigid material; the thermal interface layer 17 is the thermal interface pad and free of adhesive. The method steps of claims 8, 9, 11 are necessitated by the device structure as disclosed by Toy et al.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2835

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 5, 7, 10, 12, 13, 16, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toy et al.

Toy discloses the claimed invention except specific materials such as phenolic resin for the spacer and epoxy as an adhesive. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use phenolic resins and epoxy, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Toy discloses the claimed invention except the size of thermal interface being 4 mil in compressed condition and 6 mil being in normal condition. This size depends on the properties of chosen material and as it is stated above the selection of known materials is within the general skill of a worker in the art therefore obvious.
